

AMENDMENTS TO THE SPECIFICATION

Please DELETE on page 2, lines 1-8.

Please insert the following section heading and paragraph on page 2, beginning at line 29:

--SUMMARY OF THE INVENTION

The inventors have unexpectedly discovered that flavouring compositions with a high content of glycine hydrochloride can be used advantageously to impart a desirable flavour to low pH water based foodstuffs and beverages. More particularly, the inventors have found that a flavouring composition containing at least 5% by weight of dry matter of said glycine hydrochloride may suitably be employed to prepare flavoured foodstuffs or beverages that combine a low pH with a well balanced flavour and a surprisingly mold sour taste. --
